DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to apparatus for sterilizing medical instruments, classified in class 422, subclass 298.
 - II. Claim 13-37, drawn to method of sterilizing an apparatus for medical instrument sterilization, classified in class 422, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus claimed by the applicant can be used to practice another materially different process. The apparatus of Group I can be used to prevent any number of diseases from spreading to patients. Steam sterilization of medical instruments is a well-known technique and is the primary means for sterilizing medical instruments. More specifically, the process of group II is directed to sterilizing the apparatus of Group I for the purpose of reducing the outbreak of diffuse lamellar keratitis (DLK) which results from eye surgery. However, the apparatus claimed in

Group I could be sterilized using a different process in order to prevent a number of other biological or bacterial outbreaks such as hepatitis B and tuberculosis.

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Michael E. Bergnach on August 23, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
